Car Service Rules (1956 summary)

LOAD CARS AS FOLLOWS (In order of preference)

- 1—Do not load a car off home line if suitable foreign car of proper ownership is available or can reasonably be obtained.
- 2—Load foreign cars via owner roads, whenever possible, including points reached by owner and points beyond. Foreign cars at a junction point with owner should be loaded via owner's rails.
- 3—Load foreign cars to a Home District (as defined herein) even when not possible to route via owning line.
- 4—Load foreign cars to a District intermediate between loading point and a Home District so that cars will be advanced as directly as possible toward the owning roads.
- 5—Load foreign cars to a District beyond or adjoining a Home District; but, generally, this should not be farther than a District next adjacent thereto, except that when routing provides for a movement of a car over owner's rails there would be no restriction as to destination.
- 6—Between suitable cars available for loading, give preference to cars most distant at loading point from the owner.

Do Not Load High Class Box Cars With Commodities That Will Damage or Taint the Interior.

Observance of the above principles in selecting empty cars for loading will greatly contribute to more efficient car utilization and better car supply by preventing unnecessary empty mileage. The use of a foreign car for loading to home territory instead of loading a local car away from home is most important, since this will often prevent the movement of cars empty in both directions. Fulllest possible advance notice by shippers in the form of written car orders, specifying routing and destination, will greatly aid the railroads in furnishing prompt and satisfactory car supply to shippers.

DEFINITIONS: Home Car—A car on the road to which it belongs. Foreign Car—A car on a road to which it does not belong.

Adding a new car to the layout:

1. What might be loaded in it?
2. How did it get to Maine?
